Version Number: 2nd

Water-based, synthetic resin wood putty

Safety information

Read the label before use. For detailed instructions - precautions, consult the Product Safety Data Sheet. Poison Information Centre: (+30) 210 77 93 777.

Product information

As a water-based wood putty ideal for repairing defects on wooden surfaces such as nail holes, splits, joints, cracks etc. It is applied easily, smoothly and evenly without staining the wooden surface. It dries fast without shrinking and develops a hard surface that is sanded easily. Applied by spatula.

Physical / Technical Characteristics

Solid Content :	73 ± 2%
Drying time (at 20 °C) depending on the amount we place on the surface:	20min. - 1hour
Viscosity :	150-160 Poise
Specific weight:	1,72 ± 0,02

Color shades

Available in natural, pine, beech, oregon, oak, light walnut, teak, cherry, light mahogany, dark mahogany, medium walnut, dark walnut, white, black

Dilution

It may be thinned with water.

Application instructions

Apply with spatula. Ensure that the surface is free from grease, dust, dirt and poorly adhesive materials. Nail holes, splits, joints, cracks, hollows or any other surface imperfections are filled with STOCOXYL. After drying, sand smoothly with a suitable abrasive paper. When repairing deep defects apply more than once.

If the wood putty is hard, thin with water or alcohol. Always keep the container tightly closed.
