

Polyurethane Thinner P23

Technical Specifications
 Date of Issue: 05/05/2009
 Version Number: 1st

A strong electrostatic solvent for thinning undercoats, varnishes and polyurethane paints

P23 is a strong electrostatic solvent for thinning substrates, varnishes, and polyurethane paints. Thinning with P23 significantly increases the conductivity of the coating, which can then be applied with the corresponding electrostatic guns. Its use **is recommended for NON-conductive coatings**, making them suitable for electrostatic painting
